

Method One

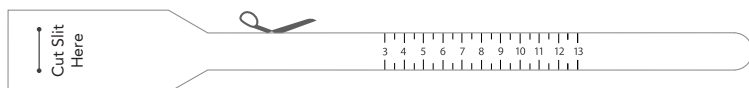

Prior to printing this page, ensure that page scaling is set to "none" on your print dialog box.

Here are some tips to make your ring size measurement more accurate:

- Confirm the printed paper size with a ruler using the rule below.

- Pull tightly. The sizer must fit snugly to produce an accurate size.
- Don't measure cold fingers. This is when fingers are at their smallest.
- For the most accurate reading, measure your finger at the end of the day, when it is largest.
- Ask you partner's mother or one of her friends if they know her finger size.
- Borrow one of your partner's rings (from the correct finger) and use the Ring Sizer to determine its size.

Method Two

- Choose one of your partners rings that correctly fits the appropriate finger, Engagement and wedding rings are traditionally worn on the ring finger on the left hand.
- Next place the chosen ring on the chart below and match the inside of the ring with the correct circle below, if you find that the ring falls somewhere between the 2 sizes it is always best to opt for the larger size.
